Brief

Marine cylindrical fenders are simple to install and operate which makes these units an economical solution for remote location and for many user berths where vessel types can not always be predicted. With advantages of progressive load-deflection cylindrical type fenders are suitable for both large and small vessels, and with a wide choice of sizes and diameter ratios, the performance of cylindrical fender can be closely matched to requirements in each case.

Cylindrical fender can be fixed to many types of structure and attached in several different ways-horizontally, vertically or diagonally and can also be adapted to suit wharf corners. The fenders are suspended either by chains, support bars or brackets depending on their size and intended application.

Specification

Length can be selected from 1000mm to 1300mm normally or customized.

Material of accessories with hot galvanizing or stainless steel.

Other requirements.

Features

Simple and economical design, easy to install.

Choice of mounting system to suit different structures and applications.

Outer diameter range is from 150mm to 2000mm.

Thick fender wall resist abrasion even after years of heavy use.

Progressive load-deflection characteristics.

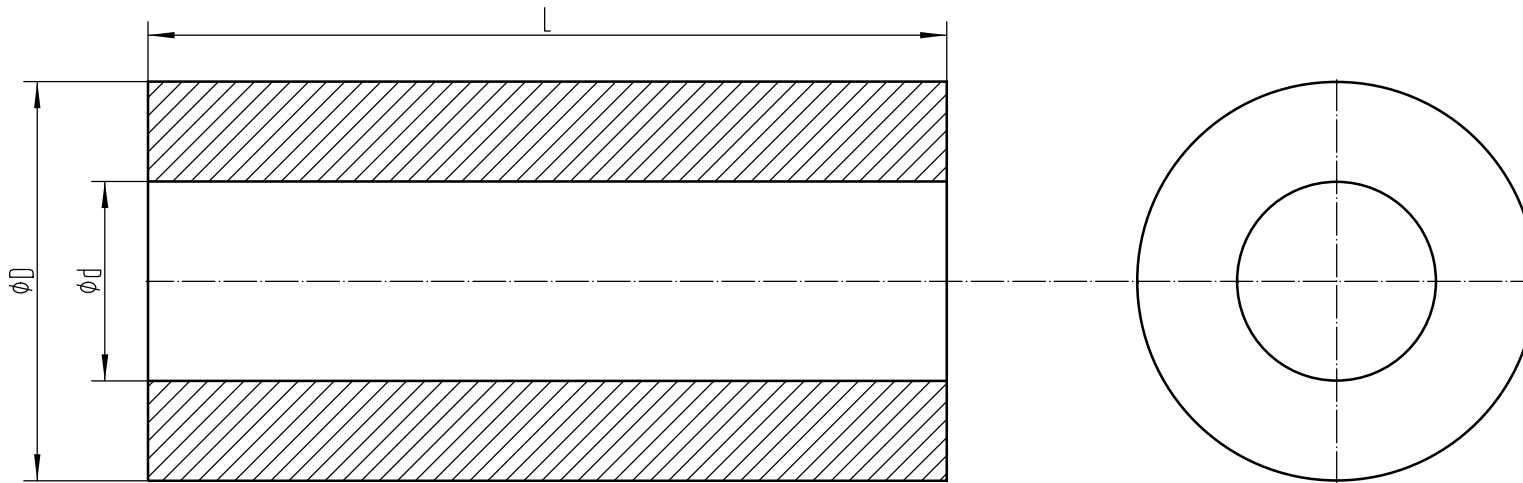

Dimensions

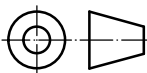

L	1000 to 1300 normally or customized.								
Φd	75	250	300	400	500	600	750	900	1000
ΦD	150	500	600	800	1000	1200	1500	1800	2000

More dimensions please see the drawing enclosed. Customized solution or any other requirements please [contact us](#).
